Sealant Removal Wipes

A unique non-woven fabric that is impregnated with a non-toxic aqueous solution that safely removes uncured or partly-cured adhesive and sealant by breaking the surface tension between the material and the substrate.

- ✓ Biodegradable (a green product)
- ✓ Non-Toxic (eliminates the need to dispose of hazardous solvents)
- ✓ Mild (employees may not need hand protection to use this product)
- ✓ Cost Effective (less expensive than cloth towels and solvents)

eOx® Cleaning & Degreasing Agents

New and unique aqueous cleaner that is not a soap, detergent or solvent. Non-Toxic, safe and biodegradable.

- | | |
|------------------------|---|
| ✓ eOx Economic | (for general cleaning: non-toxic, safe and biodegradable) |
| ✓ eOx Industrial | (for general cleaning with corrosion inhibitor) |
| ✓ eOx Aircraft Cleaner | (approved for aircraft cleaning) |
| ✓ eOx AeroTech 2000 | (conforms to ARP 1755B for engines) |

(over)

Glue Dots instantly adhere to a variety of substrates, including paper, plastic, glass, foam, wood, foil and more.

- ✓ Available in four adhesive strengths and three profiles.
- ✓ Eliminates burn injuries from hot melts.
- ✓ Reduces equipment cost and increases productivity.

Packager of Techkit and Semkit™ packages

Techkit & Semkit packages are a ready-to-use disposable cartridge-based system that stores, mixes and applies multiple component adhesives, sealants, encapsulants and many other materials.

Techkits & Semkits can be packaged with additional accessory items or parts that may be required.

Packager of SULZER MIXPAC™ side-by-side kits

Side by Side kits have fixed volumetric ratios of 1:1, 2:1, 4:1 or 10:1 and are available in 50 ML, 200 ML and 400 ML sizes. We also provide the required static mixer(s) as well as the dispensing guns and accessory items. These kits can be partially dispensed and recapped for use again at a later time requiring only a new mixer to be installed for adequate mixing.

PolyGone™ Polysulfide & Silicone Removal

Made in the USA

PolyGone stripping agents are unique formulations that remove polysulfide (PRC, Royal, 3M, ProSeal, ChemSeal) from metal, ceramic, and some composite substrates. PolyGone is effective at removing silicone RTV and polysulfide (polysulphide) sealants at room temperature. They are fast acting and environmentally friendly as opposed to regularly used solvents.

Digesil® & Di-Aqua Silicone Removal

Digesil products are designed to remove both cured and uncured silicone elastomers, resins, oils, greases including DuPont's Krytox® without damaging substrates. A unique benefit of the Digesil is their water based Di-Aqua product that removes uncured silicones. Di-Aqua emulsifies silicone oils and greases so they may be rinsed away with water. Digesil products, including Di-Aqua, are environmentally friendly.
